About QATech

QATech is a software testing and quality assurance company. Our experts help teams test better and deliver confidently, with faster releases, fewer defects and happier customers.

Reliability
Consistent, well-documented testing you can trust before every go-live.

Faster Releases
Automation and CI/CD integration shorten release cycles.

Reduced Defects
Early defect detection cuts production bugs and costly rework.

Customer Satisfaction
Transparent reporting and a dedicated team that works as your partner.

AI-Powered Manual & Automation Testing

Our QA experts combine hands-on testing skill with AI to test smarter, cover more and release faster.

AI in Manual Testing
AI-assisted test case and test data generation, smarter exploratory testing, clearer defect reports, and expert human review of every AI suggestion.

AI in Automation Testing
Self-healing scripts, faster script creation for Selenium, Playwright and API tests, smart regression selection, visual AI testing and defect prediction.

Testing AI & LLM Applications
Validation of chatbots, AI assistants and ML-powered features: accuracy, bias, safety, prompt-response quality and reliability.

Testing Services

End-to-end quality assurance across the full software lifecycle.

Manual Testing
Exploratory, functional and usability testing by experienced QA engineers.

Automation Testing
Scalable frameworks that cut repetitive effort and speed up releases.

Selenium Automation
Robust cross-browser suites with Java, Python and CI integration.

Playwright Automation
Fast, reliable end-to-end tests for modern web applications.

TestComplete / Ranorex / OATS
Desktop, web and mobile UI automation with leading commercial tools.

API Testing
REST and SOAP validation with Postman, REST Assured and contract checks.

Regression Testing
Keep every release stable with automated, repeatable regression packs.

Mobile Testing
Android and iOS testing on real devices and emulators with Appium.

Performance Testing
Load, stress and scalability testing with JMeter and k6.

IT Services: Make Your Business Online

Build a strong online presence and reach more customers with modern websites and reliable deployment.

Website Development
Fast, responsive business websites designed to build trust and turn visitors into customers.

Web Application Development
Custom web apps, portals and dashboards built around your business needs.

Deployment & Hosting
Secure cloud deployment, CI/CD setup and reliable hosting so your site is always live.

Domain, Email & SSL
Your own domain, professional business email and HTTPS security, set up for you.

SEO & Online Presence
Get found on Google and reach more customers with search-friendly pages.

Maintenance & Support
Updates, backups, monitoring and quick fixes after launch.

Our Testing Process

A clear, transparent workflow from kickoff to sign-off.

1. Requirement Analysis
Understand goals, scope and risks.

2. Test Planning
Strategy, tools, cases and timelines.

3. Execution
Manual and automated test runs.

4. Defect Reporting
Clear bug reports and retesting.

5. Release Sign-off
Final report and confident go-live.

Technology Stack

Industry-standard tools for every testing need.

Selenium	**Playwright**	**TestComplete**
Postman	**Appium**	**JMeter**
k6	**Java**	**Python**
TypeScript	**C#**	**Jira**
Jenkins / GitHub Actions	**OATS**	**Ranorex**

Ready to ship bug-free software?

Partner with QATech and let our expert QA engineers become an extension of your team. Faster releases, fewer defects, happier users.
